AWARD WINNING LUXURY WEDDING VIDEOGRAPHER

Providing wedding videography across the uk & beyond

My name is Stef, I am a wedding videographer. I consider my office to be the best office in the world, when I go to work I get to not only attend epic weddings but also capture the most beautiful and heartfelt moments. This isn't just a job to me, I pour my heart and soul into every film I craft.

As an award winning wedding videographer, I understand that every couple is unique. My aim is to create a bespoke wedding videography service that is tailored to you and your wedding day. Whether you are planning an intimate elopement in the beautiful English countryside or a grand celebration in a stunning country house. I am here to capture every moment and emotion, creating a stunning film that you will treasure forever.

My portfolio features a range of weddings across the UK and abroad, showcasing my ability to capture the essence of every wedding. Each film I have the honour of creating is completely bespoke. From the grandeur of a stately home to the romance of an intimate wedding in Tuscany, I have experience in creating films that truly reflect the beauty of the occasion.

SPECTATOR NOT DIRECTOR

Our approach to capturing your wedding day is to seamlessly blend in and naturally capture the moments as they unfold. I don't control your wedding day or turn it into a movie set, my equipment is small and unobtrusive. We all know that people don't generally like to be filmed, that's why I take a relaxed step back and spectate as the natural moments unfold.

I have a keen eye for perfection and my attention to detail is second to none. I love to make use of natural light, exposing the beauty in every moment. For me, it's all about the natural emotion and I just love to step back, relax and capture. On the day I want you and your guests to be at ease, I achieve this by seamlessly blending in with the day's events and filming from a few steps back so that you and your guests are not always aware you're being filmed. With this approach everyone can chill out and be natural, this makes for the best film.

MUCH MORE THAN JUST A WEDDING VIDEO

FILMS THAT TRANSPORT YOU BACK IN TIME

We know what it takes to create something truly special. Our films are crafted over an 80 hour post wedding process with an extremely high attention to detail. The way we see it is that your film is going to be treasured by generations to come and so it has to be perfect. We intricately create a film that when you hit play, transports you back to those warm feelings you had on your wedding day. Our films are colour graded and we use sound design to bring the film to life.

WE LIMIT OUR INTAKE TO MAINTAIN A HIGH STANDARD

Each wedding film deserves our full and undivided attention, as such we limit our intake to maintain the high standards we are known for. It is extremely important to us that all of our films are crafted to perfection, we only want to work with couples that share our vision of creating something truly beautiful. By limiting our intake we are able to spend longer creating films giving them the time needed to be EPIC.

DONT TAKE OUR WORD FOR IT

CLIENT TESTIMONIALS

Wow! Absolutely outstanding and seriously elite level standard! If anyone is debating whether to use lincolnshire Videography, let me tell you it is worth every penny. It is truly the best decision you will make. We had chosen to go for a second shooter in addition (highly recommended as this enabled so many more beautiful moments to be captured). From the moment that Stef and Steve arrived, you instantly get the impression they love what they do. They are professional and friendly, but most of all put you at ease and allow you to go about the preparations as they capture the magic. They are not intrusive and at times you forget they are even there which allows you to be natural. Once we received the trailer, we were honestly blown away. It was like watching a movie, absolutely breathtaking, and we instantly fell in love. The attention to detail and the type of content which is captured is honestly genius. We received the full video not long after and it went above and beyond our expectations, we didn't think it could get better than the trailer but wow! (Think we have watched it 100 times already) We will look back at this video for years to come, and that for me, is why I am so pleased we had these guys at our wedding.

DONT TAKE OUR WORD FOR IT

CLIENT TESTIMONIALS

We pre booked our local cinema to show our wedding video to family and friends because we knew for sure the film Stef would put together would be worthy of the big screen - we were right and everyone loved it and cried happy tears all throughout. It captured our wedding weekend in Rome just perfectly and it is only a genius like Stef who can capture all the emotions of pure love and laughter in a three day weekend and put it together in a film. We commissioned Stef for a same day edit and we are so glad we did because we just couldn't wait to catch a glimpse of the day and show our guests what was to come with our full feature film. If anyone is considering booking Lincolnshire Videography for their big day... just do it! I had to convince my now husband and he is so glad I did and funnily enough wants to watch the video more than me! Haha! Thank you Stef, you exceeded all expectations and a day that feels like such a long time coming, but goes so fast is now captured for us to feel like we can go right back to the day just by watching our film. Thank you for every minute of your time creating our film.

LAUREN & ANTHONY

INVESTMENT

We believe that a beautifully crafted wedding film is the best investment you can make for your wedding day. Our films enable you to re-live the day in a way no other medium can. To keep things simple and because no two weddings are ever the same we have one package and then a list of additional services to match your needs.
